Please read the following carefully before signing:

I, the undersigned, understand that payment is expected in full at the time of service, including all copay amounts for insurance billing. I authorize the treatment of the person named above to agree to pay all fees for such treatment. I hereby authorize my health care practitioner(s) to receive all benefits to which I and/or my dependents are entitled under my health insurance plan. In addition, I will not withhold or delay payment if my insurance company denies payment of any of my charges. I have also been informed of the \$50.00 fee (per RCW 62A, 3-515 & 520) on all checks returned by my bank NSF.

I, the undersigned, agree that I am obligated to pay for this account. Should the balance of this account exceed an amount I am able to pay in full within 30 days, a 1% per month re-billing fee will be applied (per RCW 19.52) unless a mutually satisfying solution is agreed upon by both the undersigned and my health care practitioner(s).

Please read the following so that we may discuss any questions or concerns you might have.

The Chiropractic Adjustment:

The primary treatment used by doctors of chiropractic is the spinal adjustment. I will be using that procedure to treat you. I use my hands and sometimes a small mechanical device (called the Activator tool) upon your body in such a way as to restore motion and neurologically refresh and stimulate the joints of your body which may be jammed or moving incorrectly. Very often this procedure causes an audible "pop" or "click," similar to the sensation of your knuckles "cracking." You may also feel or sense movement.

The Material Risks Inherent in Chiropractic Adjustments:

As with any health care procedure, there are certain complications that may arise during a chiropractic adjustment. Those complications include: fractures, disc injuries, dislocations and muscle strain, Horner's syndrome, diaphragmatic spasm, cervical myelopathy and costovertebral separations. Some types of manipulations of the neck have been associated with injuries to the arteries in the neck leading to or contributing to serious complications including stroke. Some patients will feel some stiffness and soreness following the first few days of treatment.

The Probability of Those Risks Occurring:

Fractures are rare occurrences and generally result from some underlying weakness of the bone which is checked for through the information in your history forms, during your examination, and when necessary; x-ray studies. Stroke has been the subject of tremendous attention which has resulted in a thorough review of the risks; the retroactive 4 year study indicated that, at most, there is a chance of one per four million office visits to a health care office (including medical offices) of such an outcome. Since even that risk should be avoided if possible, I employ tests in my examination that help to identify whether or not you may be susceptible to that kind of injury. The other complications are also generally described as "rare."

Ancillary Treatment:

In addition to chiropractic adjustments I routinely use the following treatments:

- Various soft tissue/non-force techniques
- Moist hot packs and moist ice applications (as necessary)

The Availability and Nature of Other Treatment Options:

Other treatment options for your condition may include:

- Self-administered, over the counter analgesics and rest
- Medical care with prescription drugs such as anti-inflammatory, muscle relaxants and pain killers
- Hospitalization with traction
- Surgery

The Risks and Dangers Attendant to Remaining Untreated:

Remaining untreated allows the formation of adhesions and reduces mobility that sets up a pain reaction further reducing mobility. Over time this process may complicate treatment making it more difficult and less effective the longer it is postponed. The probability that non-treatment will complicate a later rehabilitation is very high.

GOALS OF CARE:

“If you don’t know where you’re going, any road will get you there.” — Lewis Carroll

This section is important to read and fill out, so we have a clear understanding of what your goals are. This may change after we go through your patient history and physical exam or even as we progress through care, but it’s important we establish targets. Having a goal will help us determine which tests to do, which treatment style will be most effective, and where we should focus our efforts, so we create the best results and highest satisfaction possible. Please circle as many of the goals as you like. If you have any questions, please let the doctor know. Our goal is to help you reach yours.

My main concern(s) is/are: _____

My goal(s) is/are:

- Posture Correction: *“I recognize I have poor posture especially when I’m not paying attention. I would like better posture without having to constantly remind myself.”*
- Pain Management: *“I’m tired of feeling uncomfortable. I recognize that pain is a symptom of a greater issue, but my immediate concern is getting rid of the pain.”*
- Functional Rehabilitation: *“I’m experiencing discomfort and realize it’s because there is a deeper issue. I want to address the underlying cause of the pain so that I not only feel better now, but my body is more resilient in the future.”*
- Health and Wellness: *“I am concerned with my overall health and would like a plan that optimizes my body’s function, posture, and nutrition.”*
- Maintenance: *“Currently I am feeling good, but I recognize the benefits to preventative care. Just like visiting the dentist for good oral health, I’m interested in regular chiropractic care for the health of my body.”*
- Other (Please describe): _____
